

CLASS SPECIFICATIONS FOR THE SCHOOL PSYCHOLOGIST

DEFINITION

The School Psychologist is a credentialed professional with specialized knowledge regarding social, emotional, cognitive, physical, language, academic, and psychomotor forces in children which affect the learning process. One of the essential means for achieving positive change in the child is through the use of advanced intervention, prevention, and follow-up techniques and processes as provided by professionally trained psychologists.

The primary objective is the application of this specialized knowledge to ameliorate school related problems and to facilitate learning and development. The School Psychologist provides services to children, parents, teachers, administrators, paraprofessional staff, community agencies and the school system through a variety of special, unique methods. The professional work of the School Psychologist is under the direction of the Supervisor, Psychological and School Social Work Services.

QUALIFICATIONS

Credential: Possession of a standard designated services credential with specialization in pupil personnel services, or credential of equivalent authorization, issued by the California State Board of Education, and authorizing services as a school psychologist.

and

Education: A master's degree with a major in psychology or counseling from an approved institution is required.

and

Experience: While no experience is required beyond the internship of supervised field experience required for the above credential, preference will be given to applicants who have served as psychologist, psychometrist, counselor, or teacher in a public school district, and/or have an educational psychologist license. Professional experience in counseling centers or in working with emotionally disturbed or physically or neurologically handicapped children will warrant priority consideration.
